I am a current appointed member of Te Ohu Whakahaere Rangahau Māori, Research and Postgraduate (Rangahau Māori, Research and Postgraduate Committee). This is a subcommittee of Te Pūkenga - New Zealand Institute of Skills and Technology Academic Board (Te Poari Akoranga) (April 2022 - present). The purpose of the committee is to provide national-level leadership in Rangahau Māori, research and innovation, and postgraduate activity, by having oversight of Rangahau Māori and research planning, policy, funding and ethics, and to determine and support the strategic directions and approaches. A skills-based approach was taken to identify areas where expertise may be required for matters relating to Rangahau Māori, research and innovation and postgraduate education across Te Pūkenga network. Membership of this Ohu has been drawn from across the Te Pūkenga national network. Appointed or elected members shall hold their position for up to two years with an option of renewal for a third year, with any decision as to renewal to be made by Te Poari Akoranga.

Invited by Royal Society of NZ (Canterbury Branch) on 27 June 2022 – "Multimodal Digital Assistant for a Smart Food Processor" Amit Sarkar, Senior Lecturer, Ara Institute of Canterbury, NZ; John Ascroft, Chief Innovation Officer, Jade Software As Artificial intelligence (AI) becomes ubiquitous, it becomes an indispensable part of our work and lives in many ways. One such important area of application is AI-based digital assistants. They

are now becoming available in large numbers and a wide range of usage scenarios. The design-science paradigm has its roots in engineering and computer science. It is fundamentally a problem-solving paradigm. Design science paradigm has been used to create a solution for four questions concerning rethinking the user interaction process of home appliances: 1. "Can we speed up the setting process by telling the appliance what we need and want?" 2. "How can we easily configure the user settings instead of reading manuals and complicated menus?" 3. "How can we find relevant functions quickly?" 4. "How can we interact with the UI manually and via voice command?"
